

a strong team player

40 years of expertise
in release liners

Composites

At Itasa, we have been manufacturing high quality release liners for a variety of applications and industries, since 1974. Today we are considered a global reference in the release liner market, with export over 80% of our production to Europe and the US, while becoming progressively stronger in the Middle East, Asia and South America.

We focus on our customers, offering them the best service with maximum flexibility and personalized solutions.

Our philosophy consists of being "a strong team player" and we support "hand in hand" teamwork, being known for our great ability to adapt.

Over 40 years manufacturing silicone coated paper of the highest quality

Service Facts

Flexibility

Having four fully complementary production lines gives us a versatility that is equal to none. Our production capacity combined with our logistics capability allows us to meet the specific needs of each customer.

Cost leadership

With a turnover of over 66 million euros and an employee team of 133 individuals, Itasa stands out for its competitiveness. Itasa is a solid and competitive company, investing in the future. Working with Itasa means getting access to a product range that was created by the best human team using the most modern, fast and reliable machinery on the market.

Reliability is confidence

The key to reliability is the production process and its control. A controlled process ensures quality and consistency. We dominate manufacturing processes that give release liners its consistent release force based on the needs of each customer.

Knowledge management

The Itasa organizational culture is based on transparency, ethics, internal equity, respect, diversity and the creation of a safe and comfortable environment for our workers.

Our success lies in one key ingredient: human capital. Innovating in new products and processes together with our customers is important, but this is only made possible by the total commitment of Itasa's work force.

We are committed to offering the best technical support possible and to sharing our knowledge.

ITASA - A strong team player

Personalized and specialized release liner solutions

Excellent control of release differential

allow perfect resin transfer after impregnation and prevent resin pick off

Careful paper selection - even caliper

allow uniform resin coating weight and prevent from wrinkling and creasing

Excellent silicone curing rate

allow perfect release properties and prevent prepreg contamination

Optimum dimensional stability and lay-flat properties

allow even coating weight and prevent prepreg curling.

Aerospace

Our range of 2 sides coated release liners designed for aerospace applications:

Paper type	Weight	Sides	Colour	Silicon formulation	PPG	HLU	AFP	ATL
Unbleached Coated Kraft	90	2	Natural	Medium / High		✓	✓	✓
Glassine	90	2	White / Natural	Medium / High	✓	✓	✓	
Glassine	120	2	White / Natural	Medium / High	✓	✓	✓	✓

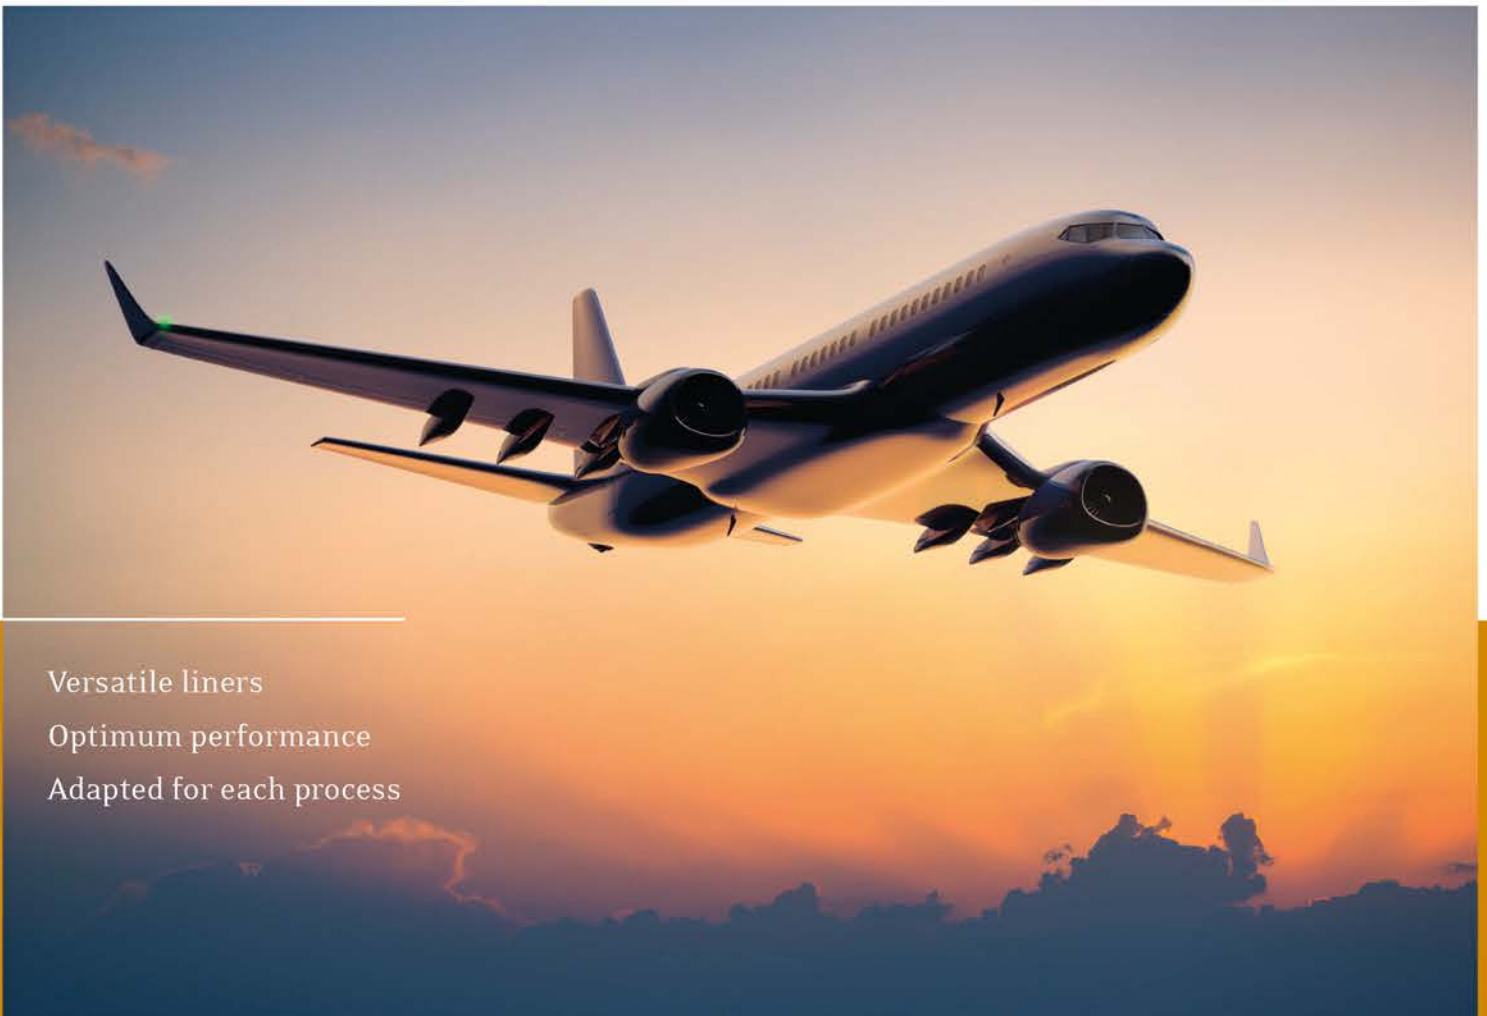

PPG = Prepregging

HLU = Hand lay up

ATL = Automatic tape laying

AFP = Automatic fibre placement

With an accurate analysis of your process as well as of the end-use of your product, we can customize our liners in order to reach the perfect release values and release differentials.

Versatile liners
Optimum performance
Adapted for each process

Wind energy

Our range of 1 or 2 sides coated release liners designed for wind energy applications:

Paper type	Weight	Sides	Colour	Silicon formulation	PPG	Re-use
Glassine	80	1 or 2	White / Havana	Easy / Medium	✓	
Unbleached Coated Kraft	90	1 or 2	Natural	Easy / Medium	✓	✓
Glassine	90	1 or 2	White / Havana	Easy / Medium	✓	✓
Glassine	120	1 or 2	White	Easy / Medium	✓	✓

PPG = Prepregging

If you need a different formulation for the wind energy sector, please do not hesitate to contact us.

1 or 2 sided coated release liners

Designed for inline or offline filming and prepregging

Adapted to re-use applications

Sports

Our range of 1 or 2 sides coated liners designed for sports applications:

Paper type	Weight	Sides	Colour	Silicon formulation	PPG	Re-use	HLU
Glassine	62	1	White	Medium	✓		
Glassine	80	1	White / Havana	Medium	✓		
Glassine	80	2	White / Havana	Medium	✓		✓
Glassine	90	1	White / Havana	Medium	✓	✓	
Glassine	90	2	White / Havana	Medium	✓	✓	✓
Unbleached Coated Kraft	90	2	Natural	Medium	✓	✓	✓
CCK ***	120	2	White	Medium	✓	✓	✓

*** Excellent dimensional stability in humid environments

PPG = Prepregging

HLU = Hand lay up

Itasa can provide customized formulations to fit the specific needs of your industry.

1 or 2 sided coated release liners designed for sporting goods

Designed for inline or offline filming and prepregging

Adapted to re-use applications

Selected thickness to facilitate usage

Automotive

Our range of 1 or 2 sides coated release liners designed for sports applications:

Paper type	Weight	Sides	Colour	Silicon formulation	PPG	Lay-up
Glassine	80	1	White / Havana	Easy / Medium	✓	
Glassine	90	1	White / Havana / Natural	Easy / Medium	✓	
Glassine	90	2	White / Havana / Natural	Medium	✓	✓
Glassine	120	2	White / Natural	Medium	✓	✓

PPG = Prepregging

Multipurpose versatile release liner

High compatibility with ud or fabrics

Tailor-made solutions specific for your applications are also available.

Ballistic Protection

Our range of 1 or 2 sides coated release liners designed for ballistic protection applications:

Paper type	Weight	Sides	Colour	Silicon formulation	Press	Continuous
Glassine	62	1 or 2	White / Havana	Medium		✓
Glassine	80	1 or 2	White / Havana	Medium		✓
Glassine	120	2	White / Natural	Easy	✓	
Glassine	140	2	White / Natural	Easy	✓	

If you need different release values and release differentials, our liners could be reformulated in order to reach your parameters.
